Quarterly Report of the
TSPC Authorities Subcommittee
November 2007

In our August report the Subcommittee reported on our review of all the authority indexes for LCA10 and MSH12 and the IND indexes for all the authority libraries. During this quarter, no further progress has been made on indexing because FCLA was working on the upgrade to version 18.

Since the last upgrade was completed in mid-October, FCLA has been getting the version 18 development server in shape in order to implement the recommendations that were made in the previous quarter. Once the revised indexes have been created in the development server, the Subcommittee will review them and discuss the results on the listserv. The Subcommittee will also make sure that all library staff have the opportunity to review the indexes as well.
